

## New version of «FFS - Flinders Fatigue Scale»

Dear customers,

Updated version 2.0 of «**FFS - Flinders Fatigue Scale**» is now available in the EG CheckWare Store.

The update includes the following changes:

1. **Questionnaire:**

- The response options for question Q5 in the English version have been arranged in the correct order, consistent with the paper version. In the Norwegian version, the order was correct and remains unchanged. The options are now split into two columns, as in the paper version.
- Copyright statement has been added.

2. **Calculations:**

- A calculation for % answered for the total score has been added.
- A calculation determining the level of severity for the total score based on Cameron et al. (2017) has been added.
- Calculation names have been assigned to all calculations.

3. **Report:**

- Report layout and content have been updated in accordance with the latest standards.
- A threshold table with severity levels highlighted in colours has been added to the report. The corresponding colours also appear in the graph and summary table.
- % answered for the total score has been added to the sidebar and summary table.
- Rated period has been added to the summary table.
- References and copyright statement have been added.

**Important!**

- FFS can be updated manually by installing the new version (2.0) in the EG CheckWare Store.
- All respondents will get access to the new version (2.0) after it is installed. Note that all previously submitted FFS questionnaires will still be registered with the older version 1.0.
- Assessment plans that contain FFS and have already been started will include the older version of the questionnaire (1.0). All new assessment plans will contain the new version of FFS (2.0).
- The update does not affect the FFS data that have already been collected, i.e. you will not lose any data.

If you have any questions about the changes, please send them to [checkware\\_support@eg.dk](mailto:checkware_support@eg.dk)

Best regards,  
EG CheckWare AS
