

## New version of the questionnaire: «ITQ - International Trauma Questionnaire»

Dear Customers,

New version 3.0 of **ITQ - International Trauma Questionnaire** is now available in the EG CheckWare Store.

Changes in the new version:

- 1) English version has been added.
- 2) Report:
  - Report layout has been updated.

### **Important!**

- Update of ITQ is done manually by installing the newest version (3.0) in the CheckWare Store. The update is irreversible, i.e. it is not possible to go back to the previous version of ITQ after the new version is installed.
- All respondents will get access to the newest version of the questionnaire and all clinicians to the newest version of the report after ITQ is updated. Note that all previously submitted responses will still be marked with the previous ITQ version (2.0).
- Assessment plans that have already started will use the previous ITQ version. Assessment plans that will start after the updated version is installed will contain the newest version of ITQ.
- The update has no bearing on data that has already been collected, i.e. you will not lose the existing data.

Any questions about the changes can be sent directly to [checkware\\_support@eg.dk](mailto:checkware_support@eg.dk).

Best regards,

EG CheckWare AS
