

New version of «Young DIVA-5 - Diagnostic Interview for ADHD in young people aged 5-17 years»

Dear Customers,

The updated version 2.0 of «**Young DIVA-5 - Diagnostic Interview for ADHD in young people aged 5-17 years**» is now available in the CheckWare Store. The update includes the following changes:

- Norwegian translation added to the package.
- Missing response option ("Having an opinion about everything and immediately expressing this") for H/I 9 item ("Do you often interrupt or intrude on others?") added for both languages.

Important!

- Young DIVA-5 can be updated manually by installing the new version (2.0) from the CheckWare Store.
- All respondents will access the new version (2.0) after installation. Please note that all previously submitted Young DIVA-5 questionnaires will remain registered with the older versions.
- Assessment plans that already include Young DIVA-5 and have been started will continue to use the older versions. All new assessment plans will automatically include the updated version (2.0).
- The update does not affect any previously collected Young DIVA-5 data. No data will be lost.

If you have any questions about the changes, please send them to checkware_support@eg.no.

Best regards,

EG CheckWare
